

LITERATURE REVIEW CRITIQUE REPORT

PAPER TITLE: ARTIFICIAL INTELLIGENCE AS A POSITIVE AND NEGATIVE FACTOR IN GLOBAL RISK

REVIEWEE'S NAME: YADAV, ROHIT KUMAR

REVIEWER'S NAME: VIGNESH J MURALIDHARAN

LENGTH OF PAPER: The length of actual literature is 46 pages

DEPTH OF UNDERSTANDING: As per my listening the reviewee had very little understanding of what he was mentioning in the paper. Though the paper doesn't mention about the survey it was not clear what the survey was useful for the literature review. I would rate (7/10)

COMPLETENESS: The reviewee had struggled in completing the full knowledge of the paper and conveying the information correctly. I would rate (7.5/10)

DIFFICULTY: I really feel the AI information in the paper was not more of technical which will help understand how it will affect the global with various example so the difficulty of the paper I would rate (6/10)

COMPREHENSIVENESS: 8.5/10

CLARITY: 8/10

ADDITIONAL COMMENTS:

The Reviewee has shown the importance and development of computer systems how they perform tasks that normally require human intelligence such as visual perception, speech recognition, decision making and how robots are outperforming in daily lives such as in industries and how AI is affecting people with global risk. The topic was interesting to discuss with little information provided by the reviewee than available from the actual literature. Since we don't have many presentations based on the AI and robots this was interesting to hear and get more information. The Paper was concluded on the research with introducing the friendly AI and its possibility for mere fallible humans to succeed on the challenge of building friendly AI.
